

ZEIGER
Industries

WHY YOU SHOULD WORK WITH ZEIGER

- Zeiger has over 4000 screws in the field. Our Triple-60 screws have been running 60% Glass Filled Resins for 2 1/2 yrs. & counting.
- We have perfected the process of grinding tool steel screws pre-hardened. Allows us to use specialized tool steels that have high carbide content and high Rockwell hardness (60Rc).
- We use only the top quality steel and can prove it. We do not advertise one material and replace it with a lower cost steel.
- We can tell you where every pound of steel was annealed, tempered, hardened, ground, machined, and polished. And how it was done.
- Zeiger freely provides information such as part schematics, inspections, and specifications.
- We design special screws and modify screw-tips with in-house engineering... usually overnight...not days or weeks!
- Our Z4: 4-piece tip is engineered for ultimate performance in 98% of applications and resins.
- The Z4: 4-piece tip is infinitely adjustable for specialty resins, applications, and process improvement at no cost to customer.
- SAVE 30% of replacement cost over 3-piece valves. You only need to replace 2 of 4 components when a Z4 valve wears out.
- Zeiger's Z4: 4-piece HA(CPM-M4) valve is used by the world's top machine manufacturers. Saving them \$millions in warranty claims!

- **Zeiger's Z4: 4-piece Carbide Valve is the manufacturer's for High Speed Molding & Extreme Wear Packages on new machines and aftermarket upgrades.**
- **Zeiger supplies Z4 Valves and Performance Screws to top OEM's worldwide.**
- **When molders and OEM's need performance components, they come to Zeiger.**
- **We stock Mallard tips for most makes and models.**
- **We do not believe in low quality components like Nitrided... nitriding can actually reduce the longevity of a tool steel base. It is cheap to make and cheap to buy so it continues to be pushed by some suppliers.**
- **Zeiger saves you money. Typically 15-50% on medium and high wear components.**

Zeiger Guarantees...

- **The quality and grade of steel used**
- **Components are heat treated to their optimum hardness and Performance**
- **The longevity and reliability of our components**
- **Our finish quality beyond all other competitors**
- **Carbide wear surfaces for LIFE**
- **All performance claims**
- **Ethical and honest business practices**

Our guarantee is to "YOUR SATISFACTION". *No fine print. No excuses.*
